Professional Summary

QA-focused CS undergrad with a Gold Medal from India Skills West-Regional 2025 in Software Testing — competed against teams across the region on live test scenarios, bug reporting, and structured test case design. Comfortable across the SDLC, with working knowledge of test planning and defect tracking from that competition and coursework. Also have good knowledge of Postman, Apache JMeter and Jira testing tools. Currently building hands-on depth in automation tools like UFT One and Selenium to go with the manual testing foundation.

Education

B.Tech in Computer Science and Engineering (pursuing)

2024 – 2027

Ashokrao Mane Group of Institutions, Kolhapur.

CGPA: 6.78/10

Diploma in Computer Engineering

2022-2024

Bharati Vidyapeeth's College of Engineering (Diploma), Kolhapur.

81.29%

Technical Skills

Programming Languages: C++, Java, SQL, JavaScript, Python, PHP

QA/Testing: Manual Testing, Test Case Design, Test Scenario Development, Bug Reporting, Defect Tracking, SDLC

Automation: Selenium, UFT One (building hands-on practice)

Tools: Git, GitHub, Postman, Apache JMeter

Soft Skills: Communication, Teamwork, Leadership

Projects

Online E-Learning Platform

HTML, CSS, JavaScript, PHP

- Built a peer-to-peer platform for course notes and video lectures, with subscription-based access control
- Manually tested the platform across different browsers before pushing update caught a few access-control bugs this way that weren't obvious from just reading the code
- Wrote the PHP backend to serve course data, split into separate files by function to keep it maintainable

Loan Approval Prediction System

Python, Scikit-learn

- Trained and evaluated an SVM model to predict loan approval status, including performance testing across different train/test splits to check the model held up consistently
- Cleaned and validated the dataset before training catching bad or missing entries felt a lot like QA work applied to data instead of code. Deployed on Streamlit for real-time use.

Experience

Java FullStack Developer Intern - Virtual Internship, Eduskills [June 2026 – August 2026]

- Tested features before they shipped checking against expected behavior, catching edge cases, and filing bugs when something didn't work as intended.
- Built and fixed front-end features using HTML, CSS, and JavaScript, and hooked them up to backend functionality
- Used Git and GitHub for version control, working through the usual branch/PR/merge cycle with the team picked up a decent feel for real development workflows here, beyond just writing code in isolation.

Web Developer Intern – Earth LogicWare Technologies [June 2024 – August 2024]

- Did manual testing before pages went live checking across screen sizes and browsers, documenting issues, and handing them back for fixes before deployment.
- Built and improved responsive web pages in HTML/CSS/JS, with a fair bit of time going into mobile usability fixes.
- Worked directly with whoever needed the change, which meant getting used to clarifying vague requests before writing test cases or making the fix.

Achievements & Leadership

- Gold Medal, India Skills West-Regional 2025 — Software Testing category, competing against teams from across the region on live test scenarios and bug identification tasks.
- Participated in India Skills National Competition 2025 for Software Testing skill.
- Worked as a Team Leader for Capstone Project in Diploma and pulled sponsorship for our project.

Certifications

- India Skills West-Regional | Gold Medalist Certification | Software Testing
- TCS ion Career Edge- Young Professional | Communication Skills | Soft Skills
- AWS Academy Graduate – Cloud Foundations | Training Badge | AWS academy
